

Pre-Apprenticeship Course

Related Training 39 Hours

Introduction: This is a flexible schedule so students who have jobs or are parents or have other commitments can accommodate their time schedules in order to complete their course of study. We are willing to use various means of communication such as documents, audio slides, videos, websites, pictures, and written responses in order to assist our students and make these challenging times less stressful.

Text books and other materials: The Pre-Apprentice Manual, Exam Book, Cosmetica Latina Brochure, The California State Board of Barbering and Cosmetology Acts and Regulations.

Assignments:

Assignment 1: Read Chapter one. It is important that you understand not only the history of the State Board of Barbering and Cosmetology but the responsibilities of the enforcement and inspection units, including exams and licensing and rules and regulations. You will complete the first 33 questions of the 100 questions from exam one. Watch hand washing video at www.cdc.gov/handwashing . Read five steps on hand washing than scroll down to “Health Promotion & Education” and click on “videos” to watch both demonstrations

Assignment 2: Read chapter two to comprehend client protection and sanitation by properly draping a client and identifying disinfecting chemicals including chemicals that may be harmful in the products we use. Safety precautions are essential in our field as well as prevention of diseases. Complete questions 34-66 from the 100 question exam. Read articles # 983 & #985 pages 143-144 in the state board book of rules and regulations. Watch two videos on web site nictesting.org/bloodspill . Scroll down to blood spill videos and click to read hand washing instructions and demonstration.

Assignment 3: Read chapter three (pgs. 19-22) on your Pre-Apprenticeship Manual. This chapter covers basic modes of sanitation, such as decontamination, rules and responsibilities of public sanitation and correct storage and proper use of chemical disinfectants and safety precautions. Complete the remainder of your 100 question exam and submit. Watch the video on blood spill procedure at [https://nictesting.org/wp-content/uploads/2020/03/Blood Exposure- Procedures- approved- 8- 5- 17.1-1.pdf](https://nictesting.org/wp-content/uploads/2020/03/Blood-Exposure-Procedures-approved-8-5-17.1-1.pdf)

Assignment 4: Continue reading chapter three (pages 23-26) on microbiology and bacteriology. The second part of this chapter has a lot of technical definitions as well the classification of pathogenic bacteria and diseases in addition to virology, parasites and fungi. Complete you second exam of 25 questions and submit. In the state board rules and regulation book read articles #977 (pgs. 127-128) and #984 (page 144).

Assignment 5: Read Chapter four (pages 27-29). Complete your 20 question exam (#3) and submit. This chapter covers various forms of disinfection for tools and equipment as well as surfaces in the establishment. Read article #979 (page 129) on disinfecting non-electrical instruments and equipment and article # 980 (page 130) on disinfecting electrical instruments, found in the state board rules and regulations book.

Assignment 6: Continue reading the remainder of chapter four starting on page 30. This portion of the chapter informs you about proper labeling and storage identifying the product and its chemical ingredients. It includes the importance of the MSDS for detailed and precise information including training sessions in the industry. An overview of the program is offered from obtaining your apprenticeship license and continuing toward your professional license. Complete the last exam (40 questions) and submit. Use your state board book and read the remaining articles #986, 987, 988, 989, and 990, (pages 137-139).

Assessment: All students must pass the written exams with a minimum score of 75%
